SUMMARY

I am an aspiring front-end developer. Although I currently work as a freelance English Tutor, I have been interested in IT, especially web programming for some times now. My experiences during my time in the Immersive Program held by Alterra Academy has taught me useful coding skills that I need as a front-end developer. I love to gain more experience in this field and I am ready to apply my passion for coding to a company willing to offer me a place among their developers. Therefore I am looking for a job as a front-end developer.

TECHNICAL SKILLS

- Languages : JavaScript, HTML, CSS.
- Libraries/framework : React JS, Tailwind css, Bootstrap, DaisyUi
- Technologies : Figma, Canva, Git.
- Other : Algorithms, Data Structures, Problem Solving, Teamwork.

PROJECTS

- **Movie-App**
  Movie app is an online database of information related to movies - including plot summaries, rating, genres and other related information. Users can browse and find all information about the movie and add them to their favorite or remove them from their favorite. This project used TMDB API, ReactJS, Tailwind css and was deployed using Vercel. See the source on Github.
- **MyPokemon**
  Pokedex app is an online database for pokemon list where users can catch pokemons and keep them as pets. I worked on the front-end using ReactJS, Tailwind css, and Poke api. Also deployed on Vercel. See the source on Github.
- **Your Story**
  Social media app where users can post stories or images and also post a comment on someone's posts. This project was developed using ReactJS, Tailwind css and was deployed on Vercel. See the source on Github.
- **AltaFashion**
  E-commerce app where users can browse and discover many products, add them to their carts and buy them. Users can also sell their own product. This project was developed using ViteJS, Tailwind css and was deployed on Vercel. See the source on Github.
